Living Things
Animals can be grouped in many different ways.
Diet —animals can be sorted by the food they eat.
Wild or domestic —Animals can be sorted by whether they are wild or domestic.
Appearance —Animals can be sorted by appearance and what they look like.

Animals from around the world

The map shows the world's 7 continents and some animals that live there.

Key

- Africa
- Asia
- Europe
- South America
- Antarctica
- Australia
- North Americ...

Camouflage
Camouflage is a special adaptation that allows animals to blend in with their environment. Camouflage can help an animal to survive by hiding from its predator or prey.

Humans

Humans are animals too. Humans all have some common features and some that vary e.g. eye and hair colour can vary.
